Summary

Full Stack engineer with 5+ years of experience building scalable web applications across frontend and backend systems using React, TypeScript, and Node.js. Experienced in delivering enterprise platforms, improving performance, and collaborating cross-functionally to ship high-impact features.

Education

Stevens Institute of Technology

M.S. IN COMPUTER SCIENCE

Hoboken, NJ

Aug 2018 - May 2020

Changchun University of Technology

B.S. IN COMPUTER SCIENCE AND TECHNOLOGY

Changchun, Jilin, China

Sep 2012 - Jun 2016

Work Experience

Walmart

San Jose, CA

FULL-STACK ENGINEER (VIA SILICON, INC.)

Mar 2025 - Present

- Developed modular and reusable React.js and Next.js components for Walmart homepage and content surfaces, improving front-end flexibility and maintainability across high-traffic pages.
- Built and optimized Node.js and TypeScript microservices deployed with Docker and Kubernetes to support reliable production releases.
- Implemented unit and integration tests using Jest and React Testing Library to reduce regressions during rapid feature iterations.
- Designed OpenObserve dashboards to monitor application metrics and improve system observability.
- Led end-to-end development of social eCommerce features as the sole engineer, integrating frontend components with backend services.
- Built GCP-based data pipelines using Python, Scala, Spark, and Airflow to enable data-driven automation and analytics.

Apple

Austin, TX

FRONT-END ENGINEER (VIA SILICON, INC.)

Jul 2021 - Oct 2024

- Developed a React.js-based internal CMS using JavaScript, Redux, and SCSS to replace a legacy Adobe solution.
- Developed core CMS features including secure mode, tagging, topic references, asset uploads, publishing, and declassification.
- Built new web pages enabling users to upload and manage localized assets; improved usability by revamping the interface and refactoring code.
- Reduced build size by approximately 30% by replacing inefficient dependencies and optimizing build configuration.
- Improved application performance by upgrading to React 18, eliminating unnecessary API calls, and reducing re-render times by up to 60%.

Silicon, Inc.

Plano, TX

SOFTWARE ENGINEER

Dec 2020 - Present

- Worked with clients to develop web applications using React.js, Node.js, HTML, and other modern web technologies.
- Participated in the full software development life cycle, including requirements analysis, coding, testing, deployment, and maintenance.

Global Resource & Technology Development Inc.

Bronx, NY

SOFTWARE ENGINEER INTERN

Jul 2020 - Nov 2020

- Implemented and maintained the company website using WordPress, improving SEO and overall web presence.
- Developed an interactive home page using React.js, JavaScript, and CSS to enhance user engagement.

Projects

Social Carousel

Walmart

FULL-STACK ENGINEER

Sept 2025 - Present

- Contributed to social eCommerce features within Walmart web platforms, focusing on user-facing components and service integration.
- Integrated frontend features with backend services and data pipelines to enable personalization and analytics-driven behavior.

Content Management System, Eikon

Apple

FRONT-END ENGINEER

Jul 2021 - Oct 2024

- Developed fresh Unified View, details pages for the application with React.js, and integrated modals to improve the user experience.
- Revamped and optimized a major portion of front-end class based components, transitioning them to efficient functional components.
- Implemented reusable components and new features using React.js. Enhanced the code quality by adding the ESLint configuration.

Content Management System, OneDAM

Apple

FRONT-END ENGINEER

Jun 2024 - Sept 2024

- Integrated reusable components using TypeScript and Angular, modernizing legacy UI modules across internal applications.
- Contributed to Apple's internal component library and collaborated closely with UX designers to refine layouts, fix bugs, and improve user experience.

Skills

Languages

JavaScript, TypeScript, HTML, CSS, SCSS, Java, Python, Scala

Frontend

React.js, Redux, Angular, Next.js, Ant Design, Webpack, Vite

Backend & Infrastructure

Node.js, REST APIs, GraphQL, Docker, Kubernetes, GCP

Data & Tools

Apache Spark, Hive, Apache Airflow, OpenObserve, Splunk, Grafana, GitHub Copilot
